Summary

Passionate Full-Stack Developer with expertise in MERN stacks, specializing in building scalable web applications. Proficient in React, Node.js, Express.js, MongoDB, and MySQL, with hands-on experience in backend development, API design, and database optimization. Adept at problem-solving, data structures, and algorithms, with a strong foundation in software development. Enthusiastic about creating efficient, user-friendly solutions and continuously learning new technologies.

Experience

DGYMBOOK

Full Stack Developer

March 2025 - Current

Remote

- Worked on core features including **expense tracking** and **member management** to simplify and improve daily gym operations.
- Contributed to the migration of backend stack from **Express & Prisma** to **Hono & Drizzle**, improving performance and maintainability.
- Collaborated with the team to ensure smooth deployment and feature rollouts across platforms.

Pinak Idea Lab Private Limited

Front End Engineer | Intern

October 2024 - January 2025

Remote

- Developed and deployed static websites using 11ty for fast, lightweight, and SEO-optimized pages.
- Collaborated with the design team to translate 3+ Figma designs into responsive, pixel-perfect web interfaces.
- Ensured 3+ cross-browser compatibility and adherence to best practices in web development.

Education

Reva University Bangalore, India

Bachelor of Computer Applications (BCA)

8.84 C.G.P.A

August 2021 - August 2024

Bachelor's degrees

Projects

TrueEcho - Honest Feedback Platform

Nov 2024 - Jan 2025

<https://true-echo-iota.vercel.app/>

- Implemented OTP-based email validation for secure user access, enhancing the security and reliability of the login process.
- Enabled anonymous feedback submissions, fostering a user-friendly environment for genuine responses.
- Optimized performance and responsiveness by leveraging server-side rendering (SSR) in Next.js.

Tech Stack: Next.js, TypeScript, NextAuth, React, MongoDB, Node.js, REST APIs

AlgoEase - Algorithmic trading app

Mar 2024 - Jun 2024

<https://github.com/afluxmhd/algo-ease-server>

- Developed a backend system that converts natural language prompts from a mobile app into trading strategies.
- Implemented Google Generative AI for natural language processing and strategy generation.
- Streamlined the process of algorithmic trading by bridging the gap between technical expertise and user input.

Tech Stack: Python, FastAPI, REST APIs, Google AI Studio

Achievements

- Solved 100+ problems in Data Structures and Algorithms on LeetCode.
- Earned [LeetCode badges](#) for consistency and problem-solving (50 days of continuous coding).

Skills Summary

JavaScript, TypeScript, React, Next.js, Node.js, MySQL, HTML/CSS, Version Control/Git, CI/CD, MongoDB, Express.js, FastAPI, RESTful APIs, Hono, Drizzle, Prisma, Problem Solving, Analytical Thinking, Leadership, Teamwork

Certifications

React (Basic) Certificate

Feb 2025

HackerRank

<https://www.hackerrank.com/certificates/iframe/1f5aff7aff50>

Learned to design and implement applications, demonstrating fundamental proficiency in React.js concepts and development.

Introduction to Entity Relationship ER Modeling

Nov 2022

Infosys Springboard

<https://drive.google.com/file/d/1WHOYYcjrJgwLmfDftvTz1mn9e-vh8Qyw/view>

Learned to design and implement relational database structures for efficient data management.
